

# 1 Manual Trike canopy

## Overview of the parts

1. Bow (2x)
2. M6 x 30 bolt + nut (8x)
3. 3.5 x 9.5 screws + snap button (4x)
4. 4.8 x 18 screws + strap holder (4x)
5. Elastic strap (4x)
6. Trike canopy

## Step 1: Assemble the bows

Put the bolts and nuts (2) in the bows (1) make sure the nuts are facing outwards.

## Step 2: Mount the bows

Mount the assembled bow in the box by pressing the bow together and snapping it into place. The nuts line up with the holes in the box. Repeat this for the other bow.

## Step 3: Put the canopy over

Put the canopy over the bows and close all the zippers. Make sure that the notch on the back of the canopy is aligned with the steering tube.

## 2 Manual Trike canopy

**Step 4: Mount elastic straps on the canopy**  
Mount the elastic straps on the canopy by looping them through the canopy and itself.

### Step 5: Mount the strap holders

Position and mount the strap holders on the front and rear of the box using the supplied screws.

**Note:** Make sure there is enough tension on the straps to keep the ten in place.

### Step 6: mount the snap buttons

Align the snap buttons with each other and mark the position on the box. Mount the snap button on the marked position with the supplied screws.

**Note:** When marking the position make sure there is enough tension on the canopy and that the zipper can still close.
